

Python

[Download Link](#)

[YT Video](#)

After downloading, you should be able to run this command “python –version” on cmd.

```
C:\Users\Admin>python --version
```

```
Python 3.13.7
```

```
C:\Users\Admin>|
```

Groq Cloud Console

1. Sign up / Log in to [Groq Cloud](#) using your Google or Github
2. On the nav bar, click API Keys
3. Click on the “CREATE API KEYS” button, with any display name and expiration date of your choice.
4. Copy the API key and save it in a secure location on your system.

Langsmith

1. Sign up / Log in to [Langsmith](#) using your Google or Github
2. On the dashboard, click "Settings" at the bottom left.
3. Click on the “+ API Key” button, add a one-word description of your choice, select Personal Access Token, select “Workspace 1”, and select an expiration date of your choice. Then click on “Create API KEY.”
4. Copy the API key and save it in a secure location on your system.

Python Basics

Refer to [CWH - Python Tutorial](#)

PS: You don't need to complete the whole tutorial, just read through articles till OOPs, try to run small Python programs, if you have learned any programming language, then Python will be a cake walk :)
